

# Event Cinema MPS delivers

Motion Picture Solutions

Our goal is to help drive the quality of event cinema and the growth of its box office value globally.

## EVENT CINEMA'S OUR THING

In 2010, Motion Picture Solutions' proprietary broadcast technology was launched. It was a defining moment for us. Over the years, MPS has supported content owners and exhibitors alike, bringing some of the world's leading cultural events live to screens around the globe. The expansion of the "alternative content" market has fundamentally transformed the cinema sector.

Event cinema has matured in the past decade, and we are proud to say that MPS's support and experience has helped contribute to the success of an industry that is forecast soon to be worth \$1 billion per annum globally.

Our company's goal is to expand the support we provide the industry on the production, management and distribution aspects of event cinema, helping to enhance both the box office value and the quality of the product worldwide.

Whether for capture, event production, booking satellite space, event management, receiver technologies or cinema support, MPS is perfectly positioned to help.
